RITeSchool implementation at Pawar Public School – a Case Study

Pawar Public School profile

The Pawar Public School is managed by the Pawar Public Charitable Trust, which is an organization that focuses on the needs of the less privileged sections of the society. As a part of the trust's mission of serving the community at large, the trust has started an ICSE school at Bhandup, Mumbai in 2006.

This school at Bhandup is the flagship school of the Pawar Public Charitable Trust. The Pawar Public School, Pune is the second school of the trust which commenced in March 2008. The third school is at Kandivli West, Mumbai commenced in March 2010.

The school is dedicated to provide all round development to the child and not merely follow a textbook oriented approach. The school is affiliated to the Council for the Indian School Certificate Examinations. The medium of instruction at the School is English.

The school has classes from Nursery to Grade X.

Challenge

The school authorities had identified that to provide excellent service it has to manage routine school management tasks efficiently. To provide all round development to students, it had to maintain regular communication with parents.

Solution

Regulus Information Technologies implemented RITeSchool, a web based school management software. Before deciding to buy the software and buying the software, the school took numerous demonstrations of the software. The software is used by the school since its inception.

1. Daily users of the RITeSchool are Accounts Head, Accountant, Administrator, Teacher Coordinator, and Principal
2. Teachers are using the software for managing student attendance and getting salary slips. They also use it for communicating with parents and developing progress cards. Software is used for reports like topper and progress reports. It is also used for uploading class and personal time tables.
3. Accounts team uses the software for getting data like fees record of few thousand students. If any employee is having query related to salary, they solve it immediately by checking data through software. Data from the software is used to work in Tally. Tally is used by the auditors to audit accounts. Vouchers are sent through the software for approval from the Principal.

4. Administration work is made easy since admission forms are available online, school leaving and bona fide certificate can be generated online. Notices are easily communicated through software. SMS facility through the software is really good for communication.
5. Principal uses the software mainly for communicating with parents, teachers, and staff.
6. The trust office in Mumbai will start using the software to get routine data.
7. Around 50% of parents pay fees online and use the software regularly. Around 25% of parents use the software occasionally. Around 25% of parents occasionally use the software.

Benefits

1. Best benefit school likes from Regulus Information Technologies is excellent after sales service.
